Backpackk — User Features (Explained Briefly)

1. AI Trip Planning

Creates a complete trip plan for you automatically based on your preferences, travel dates, and style. It optimizes timings, routes, and pacing so the plan feels natural and realistic.

2. Fully Customizable Itineraries

You can change anything in the itinerary — reorder activities, add new places, remove items, or edit how long you'll stay at each place. You can even build a trip manually without using AI.

3. Smart Recommendations

Backpackk suggests places that match your interests, shows nearby alternatives, and recommends the best times to visit each spot based on distance and travel flow.

4. Discovery & Inspiration

Explore trending destinations, get personalized recommendations, and view AI-generated destination pages with photos, best experiences, ideal seasons, and sample trips. You can save inspirations for later.

5. Maps & Visual Trip View

See your entire trip on an interactive map. Each day's route is drawn for you, with distance and travel time. You can also preview locations using Street View and browse place photos.

6. Bookings (In-App)

Book hotels, activities, restaurants, and local transport directly through the app. Backpackk shows options aligned with your itinerary so everything fits naturally into your trip.

7. Budget Management

Set a trip budget and let the app estimate costs for stays, food, travel, and activities. You can track actual spending, view category-wise breakdowns, and keep everything within your limits.

8. Personal Trip Dashboard

Access all your trips in one place — saved trips, ongoing plans, and completed travel logs. Each trip has a clean timeline and day-by-day breakdown for quick reference.

9. Notes & Personalization

Add notes to any activity, create custom locations, and tag places with your own labels. The trip becomes personalized to how you travel.

10. Search

Search for destinations, attractions, cafes, experiences, or categories like nightlife or nature. Each search result includes photos, ratings, and details to help you decide quickly.

11. Real-Time Itinerary Updates

Your itinerary updates instantly throughout the day based on your live movement. If you're running late or spend extra time somewhere, the app recalculates your plan automatically. It provides dynamic timing updates, live re-routing, alternative suggestions, and smart notifications so your itinerary always matches your real travel pace.
